For SI Units 1 in. = 25.4mm

1. All projectiles shall be set up so that they will fire as nearly vertical as possible. Although they may be fired over water,
the distances set out in the above table still apply (regarding boat traffic).
2. Aerial shells exceeding 6" or having more than a single break shall be fired only by a competent company actively
engaged in the practice if performing fireworks display demonstrations.

Any fireworks that remain unfired after the display is concluded shall be immediately destroyed by the operator.

No fireworks display shall be held during any windstorm in which the wind reaches a velocity of more than **15 mph**. Extremely dry conditions may govern also. In such cases, the local Fire Chief may authorize the display to be rescheduled.

All debris resulting from any display shall be cleaned up and removed immediately by the operator at the conclusion of the display.

At least two approved Class A (water type) fire extinguishers of at least 2 ½ gallons capacity each shall be kept at widely separated points as possible within the actual area in which the discharging is being done.

The governing body of any city/county shall require a Bond deemed adequate by them in accordance with 227.720. Licensee shall give a **Bond or evidence of liability insurance deemed adequate by the official to whom application for the permit is made, in a sum not less than \$1, 000,000** for all firework displays for which a permit is granted. This information is to be submitted to the Division of Fire Prevention.
